

EDUARDO GALLIFA

Jr QA Automation Engineer

Remote (Mexico, CST - UTC-6) | eduardogallifao@gmail.com | LinkedIn: [linkedin.com/in/eduardogallifaochoa](https://www.linkedin.com/in/eduardogallifaochoa) | GitHub: github.com/eduardogallifaochoa | Portfolio: eduardogallifaochoa.github.io/qa-portfolio

PROFESSIONAL SUMMARY

Junior QA Automation Engineer with hands-on experience in web and mobile testing, and an automation portfolio using Python, JavaScript, TypeScript, and Playwright. Strong foundation in functional and regression testing, defect tracking in Jira, and end-to-end validation of fixes in collaboration with developers. Comfortable working in remote, Agile-style environments and adaptable to different teams and workflows.

SKILLS

- Testing: Functional, Regression, Exploratory, Smoke; test cases, checklists, test evidence, defect lifecycle
- Automation: Python, Playwright, JavaScript, TypeScript
- Tools: Jira, Git/GitHub, Postman, DevTools, Charles Proxy, Android Studio, 3uTools
- Methodologies: Agile, Scrum, Kanban, Daily stand-up meetings

EXPERIENCE

Manual QA

- Executed functional and regression testing for web and mobile training apps; validated core user flows and negative scenarios.
- Designed and executed test cases and checklists; documented defects in Jira following the ISTQB foundations clear steps, expected/actual results, and evidence (screenshots, logs, recordings) when needed.
- Retested fixes, performed smoke checks, and supported release readiness with structured test summaries.
- Used DevTools and mobile tooling (Charles Proxy, Android Studio/3uTools) to troubleshoot issues and capture artifacts.

Logistics Supervisor

- Coordinated daily logistics operations and delivery routes, ensuring on-time execution and clear stakeholder communication.
- Tracked KPIs in Excel and improved reporting cadence for operational visibility and decision-making.

AUTOMATION PROJECTS

QA Site (Playwright + Pytest + FastAPI) | GitHub

- Built automated UI tests for login and contact form, covering positive, negative, and boundary scenarios; cross-browser.
- Implemented API tests and a basic CI workflow in GitHub Actions; generated test reports for quick review.

Automation Test Store (Playwright + JavaScript/TypeScript)

- Built automated workflows, ensuring usability, maintainability and scalability in the code.
- Implemented POM (page object models) and centralized user test data.

EDUCATION & CERTIFICATIONS

- B.S. Systems Engineer
- EPAM Cloud & Automation Tools Fundamentals
- Cambridge English Certificate - B2/C1 level
